Retire With Confidence

For years you've planned for your retirement. Along the way, you've made lots of smart decisions, like investing in your home.

Learn how the **New Reverse Mortgage** can help you take advantage of the existing equity in your home and live the retirement you've earned.

The New Reverse Mortgage

- How Does It Work?
- What's New?
- What Are The Advantages?
- How Are People Using Them?
- Is It Right For Me?

What Is A Reverse Mortgage?

- Created in the 1980s to help homeowners, 62 years and older, convert part of the equity in their home into money that can be used during retirement.
- Recent changes to the program have made it a more effective way for eligible homeowners to gain financial flexibility while maintaining ownership of their home.

What Is A Reverse Mortgage?

Financial research coming out of prominent universities demonstrates how a reverse mortgage may extend the life of your nest egg, and significantly increase the likelihood that you will have enough money longer into your retirement.

A New Way To Fund Retirement

“ The three legs of the traditional retirement ‘stool (Social Security benefits, pensions, and personal savings) have been considerably weakened... Current and future retirees need to re-examine their views and consider including a reverse mortgage as a part of their retirement plan. ”

- Journal of Financial Planning, David W. Johnson, Ph.D., and Zamira S. Simkins, Ph.D., “Retirement Trends, Current Monetary Policy, and the Reverse Mortgage Market”

How Does It Work?

- A reverse mortgage allows you to access some of the equity you've built up in your home and convert it into cash or a credit line. It can also be used to finance the purchase of home that better fits your needs.

How Does It Work?

Continued...

- **Monthly mortgage payments are not required. You will, however, still be responsible for property taxes, insurance, and maintenance, just as you would with a traditional home loan.**

How Does It Work?

Continued...

- **As long as you meet these obligations, the loan balance does not become due until the last remaining homeowners no longer use the home as a primary residence, or the home is sold.**

How Does It Work?

The loan amount you qualify for is calculated based on a number of factors, including:

- The **age** of the youngest borrower.
- The **appraised value** of your home.
- The **loan options** you choose.
- The **prevailing market interest rates**.

What's New?

It's safer for you.

New loan limitations help preserve your home equity funds for a longer period of time. Plus, mandatory mortgage insurance provides additional protection.

Rates & fees are lower than you might expect.

With the low fee and interest rate options offered by many lenders, today's reverse mortgage may compare favorably with a traditional home equity line of credit or home equity loan alternative.**

Financial advisors have discovered new ways of using a reverse mortgage line of credit.

With its growth feature and new options that reduce up-front costs, the reverse mortgage line of credit option can be used in new and innovative ways as part of a long-term retirement funding strategy.

What's New?

It can help reduce portfolio spend-down risk, and help your savings last longer.

It may provide more security, control and peace of mind than a traditional home equity line of credit.

Your heirs are more clearly protected

If your heirs want to keep the home, they may pay off the remaining loan balance, or 95% of the appraised value whichever is lower.

If they don't want to keep the home, it's listed for sale and the loan balance is paid off with the proceed received.

You or your heirs never to re-pay more than the value of the home. And once the loan is repaid, any remaining equity belongs to you or your heirs.

What are the Advantages?

No More Monthly Mortgage Payments

- There are no monthly mortgage payments required as long as you comply with your loan agreement and live in your home. (You will, however, still be responsible for property taxes, insurance, and maintenance, just as you would with a traditional home loan.)
- If you have an existing mortgage or other debts, and substantial home equity, you can use a reverse mortgage to consolidate those debts and reduce your monthly expenses.
- Or if you own your home free-and-clear, you can get the additional funds you need with no minimum monthly repayments required.

What are the Advantages?

Continued...

- **Keep your home**

You retain complete ownership of your home.

- **Federal insured loan**

Most of today's reverse mortgages (known as Home Equity Conversion Mortgages, or HECMs) are insured by the Federal Housing Administration.

American Financial Network Inc., is not acting on behalf of or at the direction of the federal government, and this offer is not being made by an agency of the government.

- **Tax-free with no restrictions.**
The proceeds received from a reverse mortgage are generally not considered taxable income. For tax issues, you should consult a qualified tax advisor. While there are no restrictions on how loan proceeds may be used, access to some of your funds may be limited for the first 12 months of the loan.
- **Defer Social Security**
A reverse mortgage could help you delay receiving your Social Security benefits-the longer you wait to access Social Security, the more you will receive when you do!

****Borrowers should consult with the appropriate government agencies to determine how a reverse mortgage can affect social security and other government benefits.**

How Are People Using Them?

Today, more homeowners and financial planners are using the reverse mortgages in new and innovative ways a part of their long-term retirement strategy.

How Are People Using Them?

Smart ways to help meet your retirement goals:

- Use a line of credit to build a safety net for unplanned emergencies, home repairs, and health care expenses.
- Supplement income with monthly tenure payments from a reverse mortgage.
- Afford to retire earlier, or else wait until later (age 70) to maximize your lifetime Social Security benefits.
- Buy a new home that fits your needs.

Is It Right for Me?

A reverse mortgage may not be the right solution for everyone, however, if you are looking for ways to maximize your retirement savings and income, it is worth considering as part of a balanced retirement plan.

There are even different types of reverse mortgage products to fit your specific needs.

Is It Right for Me?

You can choose to receive your funds as:

- **A Line of Credit**

Use your proceeds now or access them in the future when you want or need them.

You are charged interest only on the proceeds you take. A reverse mortgage line of credit cannot be reduced or revoked, as long as the terms of the loan are met; and the unused line of credit grows, giving you more available funds.

Is It Right for Me?

- **A Lump Sum Payout**
Use your proceeds to improve cash flow by consolidating an existing mortgage, or other debt; to cover a large expense; or to finance a new home.
- **Monthly Payments**
Supplement your retirement income by receiving a payment each month-either for a set period of time, or as long as you live in your home.
- **A Combination of These**

Case Study

The Situation

Mary and John, both age 70, have an appraised home value of \$300,000 and no mortgage. They have saved well for retirement, but could use some extra funds to improve their financial flexibility. They'd also like to establish a cash reserve that will give them easy access to additional funds should they need them, to avoid dipping into income-producing invested assets.

The Solution

Mary and John qualify for \$156,450 in reverse mortgage funds. They opt to receive a steady stream of monthly payments, for as long as they live in their home. This helps offset their daily expenses and healthcare costs.

After \$80,445 are set aside to cover the lifetime advances (known as “tenure payments”), this leaves them with an additional \$76,005 that they take as a line of credit, which they can draw upon as needed. As an added benefit, the unused line of credit grows over time, regardless of home value-providing more available funds. If their expenses increase in the future, they can change the amount of the tenure payments (thereby reducing the line of credit); or they can draw funds from their credit line.)

Does My Home Qualify?

Eligible property types include:

- **Single-family homes**
- **Two to four unit properties**
- **Manufactured homes**
(built after June 1976, titled and taxed as real property under state law)
- **Condominiums and townhouses.**
Co-ops do not qualify.

Are there Special Requirements?

- All borrowers on the loan must be at least 62 years old, your home must be used as your primary residence, and must have sufficient equity.
- Before applying, you must receive reverse mortgage counseling form an independent counselor who's approved by the U.S. Department of Housing and Urban Development (HUD).
- And you'll need to work together with your loan originator to assess your finances and make sure you can fulfill your monthly obligations, such as insurance, real estate tax payments, and home maintenance obligations.

Additional terms and conditions may apply. Please consult your loan professional.

Q: How Does the Interest Work?

- **You are charged interest only on the proceeds that you receive.**
- **Fixed and variable interest rates are available.**
- **Interest is not paid out of your available loan proceeds, but instead is added to the balance of the loan (the amount owed) and compounds over the life of the loan until repayment occurs.**

Q: When Does It Have to be Paid?

Continued...

- **The loan balance is due to be paid when the youngest person on the title no longer uses the home as a primary residence (moves away for 12 months), sells the home, or passes away.**
- **The reverse mortgage is a non-recourse loan, which means no debt will be left to the heirs.**
- **If the loan balance is less than the market value of the home, the remaining equity is given to the homeowners/heirs (if the home is sold).**

Q: What If I Have Current Mortgage?

- You may qualify for a reverse mortgage even if you still owe money on an existing mortgage.
- However, any existing debt must first be paid off.
- You can pay off the existing mortgage even with your reverse mortgage proceeds, money from your savings, or assistance from a family member or friend.

**Reverse mortgage replaces the existing mortgage obligation if reverse mortgage funds are used. Borrowers must continue to make property tax, insurance, and other maintenance payments in order to avoid risk of default. A reverse mortgage is a home-secured debt that must be repaid upon maturity.
