

MASTERS COACHING PROGRAM

American
Financial
Network

The AFN Masters Coaching Program is a highly intensified program that requires the highest level of commitment to your business to develop you into a top producer at AFN. The AFN Masters Coaching Program focuses on developing a powerful strategic plan, creating and mandating execution of the plan, utilizing dynamics within the plan, and the highest level of time management. Participants will learn to develop the strongest mindset and highest level of belief in the execution of their business on a daily basis.

The AFN Masters Coaching Program will integrate a higher level of communication between participants and Team AFN leadership, with multiple opportunities to communicate with all the different leaders of Team AFN. The program participants will have an “Accountability Partner” in addition to the program facilitator Anthony Casillas. Being a part of this program may present the opportunity for you to be an Accountability Partner for a participant in the Mentorship Program, allowing you to expand your leadership qualities.

The AFN Masters Coaching is an exciting opportunity for Team AFN individuals who are ready to “step up” in their business and strive to be the best.

Concentrated One on One Coaching® with Team AFN National Business Coach

Highest Commitment Level Required

A Master Execution Formula that YOU build with the National Business Coach
